Press Release

11 October 2021

**TRANSASECO
NORDIC**

Globelink is finally in Nordic!

The Globelink Group is pleased to announce that we will finally have our own offices in Nordic. We have been in the Nordic market for some time and in line with our expansion strategy and as the opportunity present itself, we have decided that it is time to have our direct presence in this important region.

In collaboration with TransAseco Nordic, we will continue our various direct services in and out of Nordic. In the interim, TransAseco Nordic will act as the representative office of Globelink. With our global network, we will continue the Nordic story with a stronger presence and tighten control over the service quality which our customers had come to expect. As a neutral NVOCC, we are bringing the Globelink's brand of high service quality and customer experience to the Nordic market with the new set-up in Sweden, Norway, Denmark and Finland. With presence around the world particularly in Asia, our customer will be able to enjoy a more integrated system with strong products and LCL solutions for their LCL cargo.

With its roots in Singapore since 1988, Globelink is a leader in handling LCL consolidation cargo around the world. Globelink has a presence in 32 countries with a global coverage of a quality network. With global expertise and market insight, Globelink continues to create synergies and opportunities that benefit both existing and new customers.

TransAseco has since its launch in 1998 developed a well-established position as a LCL consolidator in the Nordic market. TransAseco has its own offices in Norway, Sweden, Denmark, and Finland. Their reputation is based on providing high-quality services, local market knowledge, long experience in handling LCL shipments, and overall business stability. TransAseco is a Nordic company that speaks the local language with the deep knowledge and understanding of the local markets in the respective countries.

Our local personnel will reach out and make contact with you shortly to provide you with more information and updates.
